No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                       645

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  DB 80

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                B B

Patent NO. 6518063

GENERAL INFORMATION:

APPLICANT: DUCY, PATRICIA

APPLICANT: MARSENTY, GERARD

TITLE OF INVENTION: 0SF2/CBFA1 COMPOSITIONS AND METHODS OF USE

FILE REFERENCE: UTSC:525

CURRENT APPLICATION NUMBER: US/09/086,663A

CURRENT FILING DATE: 1998-03-24

PRIOR APPLICATION NUMBER: 60/080,189

PRIOR APPLICATION NUMBER: 60/040,430

PRIOR FILING DATE: 1998-03-24

PRIOR FILING DATE: 1997-05-29

NUMBER OF SEQ ID NOS: 83
                                                                                                                                                                                                                                                                                                                                                                   밁
                                                                                                                                                                                                                                                                                                                                                                                                  á
                                                                                                                                                                                                                                                                                                                                                                                                                                           밁
